

# TOPMAN®

BASIN | KITCHEN | BATH

**TOPMAN**<sup>®</sup>

BASIN | KITCHEN | BATH

*A faucet is a device that controls  
the flow of water from a pipe or  
reservoir into a sink or bathtub*

*Faucets Basin Kitchen*

# ABOUT US

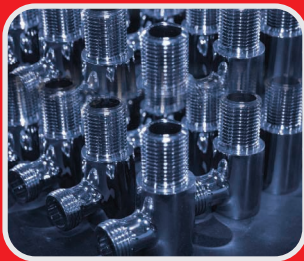

## Enduring Quality Superior Craftsmanship Timeless Style

The manufacturing process of the faucet determines the durability of the faucet. I believe that many customers are not very clear about the manufacturing process of the faucet.

## Washerless Ceramic Valving

It controls the flow of water under any water or temperature condition, resists debris and is easily maintained. It turns on smoothly and turns off without any dripping.

## Metal Construction

Topman Faucets are constructed with Honey Brass metal which provides great strength, durability and finish quality.

## 100% Factory Tested

At Topman faucets are pressure\*-tested against dripping and leaking. They are also tested for performance to ensure that they meet the most stringent requirements and standards.
